Julie Ruth, JRuth Code Consulting

“Code Action Committee Update”

11:00 a.m.— 12:00 noon (during the Code Action Committee Meeting)

During this session, reports on the impact of various code related activities, as they pertain to fenestration products, will be given. The activities to be reported on will include:

- The development of the:
 - ◇ 2018 *International Residential Code*
 - ◇ 2018 *International Energy Conservation Code*
 - ◇ Structural provisions of the 2018 *International Building Code*
- Ongoing efforts to merge the *International Green Construction Code* and ASHRAE 189

Gary Schwartz, PHASE Associates LLC

“OSHA Compliant: How to Recognize and Control High Risk Manufacturing Occupational Health Hazards?” - 12:30 p.m. — 1:15 p.m.

This presentation will offer an overview on how to recognize, evaluate and implement controls for high risk health hazards that may occur in the window and door manufacturing industry. Emphasis will focus on OSHA compliance tactics.

Areas to discuss will include:

- Step 1: Identifying hazards and risks
- Step 2: Evaluating and prioritizing risks
- Step 3: Determining preventive action
- Step 4: Implementing action
- Step 5: Reviewing progress

Download the AAMA app (*Apple or Android devices*) to view full details on these sessions, as well as background information for the presenters.
